

JUNE 28, 2014 - CANTON TICINO, SWITZERLAND

Bits of Future: Food for All
International Cooperation Project for Food and Energy Security

The Association Scienza Per Amore, in collaboration with the company BioHyst, are organizing an event to present the international cooperation project *Bits of Future: Food for All* aimed at supporting developing countries. Guidelines and the amount of time needed for the project implementation, as well as the involved participants and their roles, will be illustrated in the meeting. On the same occasion, the industrial machine specifically designed for this project will be presented. This machine will be used to process biomass coming from the African countries who have officially joined the initiative already, and from those who will join in the future.

(RSVP scienzaperamore@hyst.eu)
